

# Construction of Boiler Rooms and Indoor Gas Installation

We install gas in industrial objects and premises, communal buildings, family homes, and we also build and reconstruct boiler rooms at a professional level.

## Our integrated services include

- Consulting services (proposal of the design, economics, study)
- Preparation of projects
- Preparation of the financial balance (calculation, quotation)
- Delivery and installation of the gas equipment with warranty
- Delivery of all revision reports
- Service, control and operation of boiler rooms

## Within the indoor installation we offer

- Complete installation of gas in buildings
- Deliveries and installations of gas appliances
- Gas connections
- Service checks and repairs of gas appliances
- Revisions and tests of gas appliances
- Repairs and reconstructions of water installations, wastes and internal sewage
- Reconstruction of bathroom units
- Reconstructions of sanitary fittings
- Connections of water and sewage, water installations
- Electrical works, including revisions
- Design and engineering activities
- Construction and reconstruction of heating systems – replacement of distributions and heating elements
- Regulation of the heating system with regard to savings thanks to thermoregulation valves

## We also provide the following equipment

- |                           |             |
|---------------------------|-------------|
| • Thermostats             | • Pumps     |
| • Water flow heaters      | • Valves    |
| • Gas pressure regulators | • Radiators |

## Offered boilers:

DAKON, VIADRUS, THERM, BUDERUS, VISSMANN, VAILLANT, JUNKERS, De DIETRICH, IMMERGAS, LOOS, PROTHERM
